

F. Faculty

time limit per test: 2 seconds

memory limit per test: 256 megabytes

In 2077, after the world was enslaved by robots, the robots decided to implement an educational reform, and now the operation of taking the modulus is only taught in the faculty of "Ancient World History". Here is one of the entrance tasks for this faculty:

We define the *beauty* of an array of positive integers b as the maximum $f(b_i, b_j)$ over all pairs $1 \leq i, j \leq n$, where $f(x, y) = (x \bmod y) + (y \bmod x)$.

Given an array of positive integers a of length n , output n numbers, where the i -th number ($1 \leq i \leq n$) is the *beauty* of the array a_1, a_2, \dots, a_i .

$x \bmod y$ is the remainder of the division of x by y .

Input

Each test contains multiple test cases. The first line contains the number of test cases t ($1 \leq t \leq 10^4$). The description of the test cases follows.

The first line of each test case contains a single integer n ($1 \leq n \leq 10^6$) — the size of the array a .

The second line of each test case contains n integers a_1, a_2, \dots, a_n ($1 \leq a_i \leq 10^9$).

It is guaranteed that the sum of n across all test cases does not exceed 10^6 .

Output

For each test case, output n integers — the beauties of all prefixes of the array a .

Example

input	Copy
2	
5	
3 1 4 1 5	
7	
5 11 11 4 2 1 10	
output	Copy
0 1 4 4 5	
0 6 6 7 7 7 11	

Note

The beauty of the array 3 is 0 .

The beauty of the array $3, 1$ is $f(3, 1) = 1$.

The beauty of the array $3, 1, 4$ is $f(3, 4) = 4$.

The beauty of the array $3, 1, 4, 1$ is $f(4, 3) = 4$.

The beauty of the array $3, 1, 4, 1, 5$ is $f(4, 5) = 5$.

Codeforces Round 1026 (Div. 2)

Finished

→ Virtual participation

Virtual contest is a way to take part in past contest, as close as possible to participation on time. It is supported only ICPC mode for virtual contests. If you've seen these problems, a virtual contest is not for you - solve these problems in the archive. If you just want to solve some problem from a contest, a virtual contest is not for you - solve this problem in the archive. Never use someone else's code, read the tutorials or communicate with other person during a virtual contest.
